1) This means taking a long hard look at your business to better understand what you already have to help you get where you want to go & what else you need.

② Practice mindfulness: Focusing one's awareness of the present moment paying attention to one's feelings & thoughts without any judgement can be a very powerful experience

③ How would I like to experience my life?
When I started my journey of self-discovery I asked myself the age old question who am I? until I encountered this post from psychology today.

④ Find your core values: Here try to figure out your foundational beliefs. This determines your behaviour & guides your decision making.

⑤ Journaling: writing your thoughts down in a diary or journal is a very simple but powerful self-discovery technique.

⑥ Find your purpose & passion: what is it that you do & keep doing for hours day & even years without any external motivation

① Ask for feedback: It is said that a man churning a pot may not beware of how straight or curved it is whilst he is still at it.

② Journey back to your childhood: we all have nostalgic feeling about our childhood. The games we played the mischief companies to the insatiable the simplicity of life itself.

③ Challenges not struggles: Let's face it we all face difficult times at one point or another in our lives albeit to varying degrees.

④ Pay attention to what you say yes & no to: Aristotle says "we are what we repeatedly do" put another way, we are what we say yes to.

⑤ Surround yourself with Growth Enablers: we all have people in our lives some we choose others well we just have to live with.

2) Types of Business Models

① Business-to-Business Models (B2B)

When the dealing or the transactions take place between two companies or the business than this types of business models. It know as business to business models.

② Business-to-consumer model (B2C):
Business-to-consumer business model is a model that refers to businesses that sell their services or the products directly to the consumer, who are the end users of the products or services.

③ Subscription-based models:

Any application-based business or software companies have subscription-based business models. They offer their product as a one-time purchase. In return, company earns monthly or annual revenues.

④ on-DEMAND BUSINESS MODELS:

It is the most recent form of model which is made out on the need by answering immediately under this type of business models is prepared in such a way where all the questions will be answered by just a click of a button in seconds.

7) लाली काहली एक गौ के बाल में
जिन्हा भया है। रामजीदास और कुष्ण
जी दास दो भाइय होते हैं और लाली
भाई का बचपन लाली होते रामजी दास
उसके भाइय के बचपन में बहल धरम
5 करवा है वह बचपन उन्हें वाउजी
और उसकी पत्नी का लाली बुनार
है लाली को उन बचपन का देखकर
को देखकर उसकी बचपन की कड़ी

मधुमस होती है वह अपने पत्नी से भी
 लड़ती है को वो उन बच्ची से धारा
 न कर और अपने बच्ची के बारे में
 कुछ सोच ताई का यह व्यवहार
 उनके पत्नी को अच्छा नहीं लगता
 क्योंकि वह बच्चे की तो अपनी ही है
 और ताई कभी कभी तो उन पर
 उन्हें हीरकपी और कभी कहिल मारा
 प्रपंच भी करती है। एक दिन लाल
 वह लड़का एक पर पतंग के रूप
 रहा था। तब उसे समझ लार वह
 जाती है। और वह लड़के कहता है।
 की मुझे भी पतंग ला दो और
 ताई बना कर देती है। वह उसे बका
 धत से गिराने वाला होता है और
 और मारा से ताई को बुलता है बखाने
 के लिए ताई पहले बचाव के लिए नहीं
 आती और जब जाती है। जब वह धत
 से और जाता है। और वह देखकर ताई
 को दील पागलता है और वह बड़े बड़े
 हीन के लिए भीमार हो जाता है और
 जब होश में आती है तब उसे लड़के से
 कहिल मारा धारा करती है।

3 ममता का चरित्र चित्रण

ममता का अच्छी और लयानु भी।
ममता जल्दी ही विधवा हो जाती है। उसके
पिताजी उसके बहुत शांत बाल और शांति
आता है। और वे कहते हैं पिताजी के कंधे
हैं ममता के पिताजी कहते हैं की बड़ी यही
घात होने वाला है कि अब हम यही जान
दिया। तब वह घात होता है उसके
पिताजी गुजर जाते हैं। उसके बाद वे शय
जाती हैं उन दुसरे माँ आकर एक जाँकी
में रहने लगती हैं। एक रात एक अचानक घात
लगे आता है। और वह विक्रम के लिए पुत्र
है। 'ममता' यहाँ मना करती है बाद में वयक्त
होने के ~~असका~~ अर्थ देते हुए वे कुछ
बाहर जा रहती हैं। वे एक महारण्य हो
है, ममता को अदभुत देता है। उसके
बाँनने लगी वे भाग जाती हैं
ममता को 30 वर्ष होना थे काल
कीक मीनिक आती है पुत्र है की 56
एक अचानक हुआ करती थी बाद में वी
मात्र जाती है।

Duration: 45

Subject: Financial Accounting- II
min

Answer the following Questions.
(10*2=20)

- 1) Mr. Chandru filed his insolvency petition on 31-12-2021. He had the following asset and liabilities:
- | | |
|---|----------|
| Unsecured creditors: Trade Creditors. | 1,25,000 |
| Bills Payable | 12,000 |
| 15,000 | |
| Creditors fully secured on buildings. | 30,000 |
| Building (estimated to produce Rs. 24,000) | 18,000 |
| Creditors partly secured on shares in 'A' Ltd. | 21,000 |
| Shares in 'A' Ltd (estimated to realise Rs. 13,500) | 3,000 |
| Preferential Creditors Payable in full | 1,500 |
| Cash in hand. | |
| Machinery (estimated at Rs. 7,500) | 10,500 |
| Furniture (estimated to produce Rs. 2,250) | 4,500 |
| Stock-in-trade(estimated at Rs. 19,500) | 27,000 |
| Books debts: Good | 28,500 |
| Bad. | |
| Doubtful(estimated to Rs. 6,000) | 9,000 |
| 9,000 | |
| Bad. | 9,000 |
| Bills receivable (estimated at book value) | 8,250 |

He started his business with capital of Rs. 90,000 on 1-1-2018. His business resulted in a profit of Rs. 28,500 in the first two years and incurred a loss of Rs. 66,750 in the last two years after allowing interest on capital Rs. 3,000 each year. His total drawings were Rs. 75,000 during the above period.
Prepare Statement of Affairs and Deficiency Account.

- 2) Fire occurred in the business premises of Mr. Vijay on 1-7-2021 and the entire stock was destroyed. However, the books and records were saved and the following information was obtained,
- | | |
|-----------------------------------|----------|
| Value of stock salvaged. | 4,000 |
| Stock (1-1-2020) | 70,000 |
| Stock (31-12-2020) | 80,000 |
| Purchase for the year ending 2020 | 1,60,000 |
| Sales for the year ended 2020. | 2,00,000 |

जागो फिर रक्त बार

कविता में कवि भारत के अतीत की गाँव - गाथा को स्मरण करते हुए देशवासियों को नई उम्मीद और आजादिली को अपनाते के लिए प्रेरित करते हैं। वे हातिदारीक परिवेश की और संकेत करते हुआ कहते हैं कि भारत का अतीत बौद्ध हो गाँवशाली था। हमारे यहाँ के वीर युद्ध - क्षेत्र में प्राणों की बाजी लगाकर अमरत्व को प्राप्त हो जाते थे। हमें ही वीर योद्धाओं की गाँव गाथा का गुणगान करते हैं।

यहाँ के समुद्र के विशाल नदियों और उनके तटों पर रहनेवाले लोगों अर्थात् सिंधु के लोगों से थी। इसीलिए जब - जब विदेशी आक्रांताओं ने भारत पर आक्रमण किया है। तब - तब यहाँ के वीरों ने चतुर्दश सेना के उनका डटकर मुकाबला किया।

~~भारतवासियों~~ तुम सदा से ही महान रहे हो तुम्हारे मन में जो दृढ़ता, कायरता की भावना काम गमनाओं की आरुक्ति के भाव उत्पन्न होते रहे वे सभी लष्ट होतवाले हैं।

कहते हैं की सवा सवा लाख पर लाख
को चढ़ाऊंगा, गोबिन्द सिंह नीज नाम जब कहाऊंगा
जब अंग्रेजी हमारे देश में आये तो हमारे पास
अपना कुछ न रहा। हमारा देश उनका गुलाम बन
या जाने कीतने लोग भूखे प्यासे मर गये।

भारतीय लोगो को न जाने कितने दुःख
रहने पडे न उनके पास कोई काम था और
ना ही शिक्षा जिससे वे कुछ कर पाते अपनी
दुःख के लीफा।

इस देश के नौजवान ने अपने जानों पर
बेलकर अपनी देश की रक्षा की अपने देश
के लीफा वीरगती को प्राप्त हुआ।

कवी कहते हैं की सब माया है - माया है
उक्त हो सदा ही तुम, बाधा - विहीन बन्द चन्द ज्यो
इने आनन्द में सच्चिदानन्द रूप माहामत्र ऋषियों का ।
की इस सब को फिर हाक बार जागने का
संदेश दे रहे हैं । और सब कार्य में हमें फल
मिलने की प्रार्थना करते हैं । कवी कहते हैं की
भागो फिर हाक बार ।

ALKANES

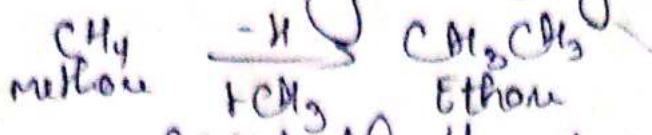

Alkanes which are the hydrocarbons, represent the parent family from which all other families have been derived by replacing one or more hydrogen atoms with suitable functional groups. They are also known as the saturated hydrocarbons or paraffins. They have the general formula C_nH_{2n+2} & are open chain in nature. Moreover, the carbon atoms involved in these molecules have their normal tetrahedral bond angle. Alkanes have low reactivity because of their stable structure.

STRUCTURE & NOMENCLATURE OF ALKANES

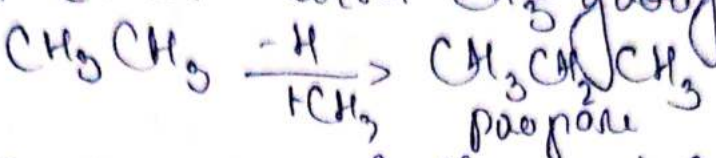

The first member of the alkane family is methane (CH_4). In this molecule, the carbon atom is located in the centre of a regular tetrahedron & the four H atoms joined to it by C-H bonds are directed towards its four corners. The H-C-H bond angle is $109^\circ 28'$. The spatial formula of methane can also be directed towards the eye of observer. The normal line represents the bond that lies in the plane of the paper while the two C-H bonds indicated by dotted lines project behind the plane of the paper.

The next member of the family is ethane (C_2H_6) & can be obtained by replacing one H atom in methane molecule with a methyl (CH_3) group

Similarly propane (C_3H_8) the third member of the family is formed in a similar way by replacing one H atom in ethane with CH_3 group

The IUPAC & common name of the first six members of the alkane family are given in the following table

Value of n	Alkane	IUPAC name	Common name
1	CH_4	Methane	Methane
2	$CH_3 \cdot CH_3$	Ethane	Ethane
3	$CH_3 \cdot CH_2 \cdot CH_3$	Propane	Propane
4	$CH_3 \cdot (CH_2) \cdot CH_2 \cdot CH_3$	Butane	n-butane
5	$CH_3 \cdot (CH_2)_2 \cdot CH_3$	Pentane	n-pentane
6	$CH_3 \cdot (CH_2)_3 \cdot CH_3$	Hexane	n-hexane

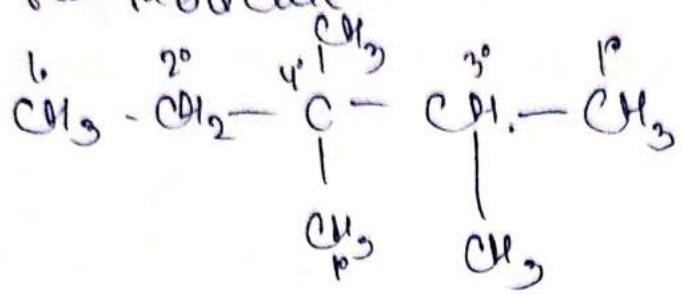

The prefix n- is used in the common name of the compound with four or more carbon atoms this indicates a straight or normal chain of carbon atoms & no branching is involved

CLASSIFICATION OF THE CARBON ATOMS IN ALKANES

The carbon atoms in an alkane molecule are classified as primary (1°) secondary (2°) tertiary (3°) & quaternary (4°)

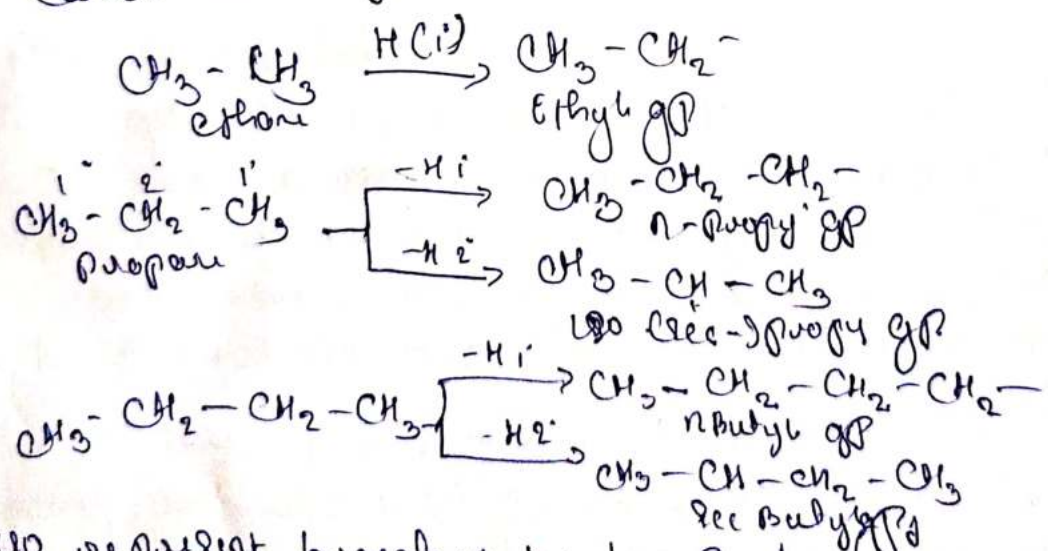

- (i) A Primary carbon is linked to one carbon atom
- (ii) A Secondary carbon is linked to two carbon atoms
- (iii) A tertiary carbon is linked to three carbon atoms
- (iv) A quaternary carbon is linked to four carbon atoms

The H-atoms attached to these carbon atoms are also designated accordingly i.e. as 1°, 2° & 3° Quaternary carbon atom has no hydrogen atom attached to it. The following example shows different types of carbon atoms in the molecule.

ALKYL GROUP

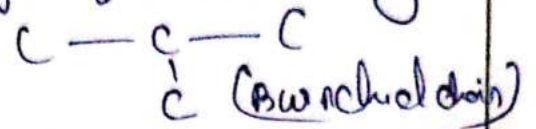

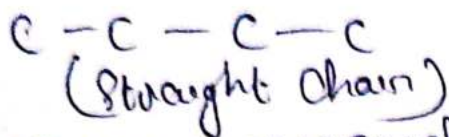

Removal of the H-atom from a carbon atom in either the molecule forms a group called alkyl group with formula $(\text{C}_n\text{H}_{2n-1})$. It may be noted that the number of the alkyl groups which are from a particular alkane molecule depends upon the total number of different carbon atoms present for example methane & ethane molecules have only primary carbon atom & give only one alkyl group while propane & n-butane with both primary & secondary carbon atom yield different alkyl groups as shown below.

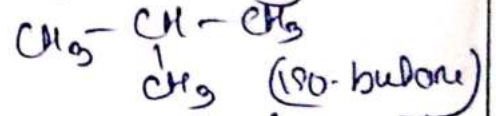

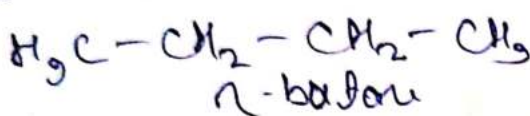

No separate branching by two similar groups no indicates secondary or tertiary. A particular alkyl group will be, if the H-atom attached to secondary carbon atom has been replaced then it is sec-butyl group. These groups should not be confused each other.

STRUCTURAL ISOMERISM IN ALKANES!

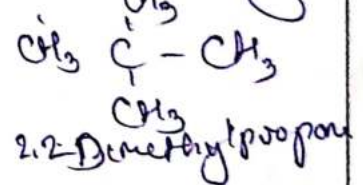

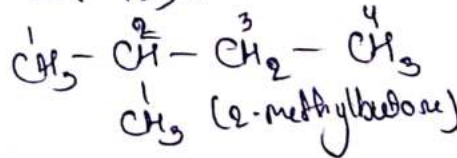

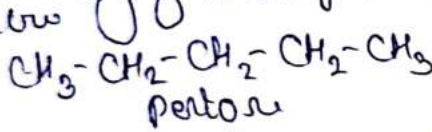

Alkanes exhibit only chain isomerism which is discussed as follows- In the first three members of the alkane family the carbon atoms are linked to each other in a straight chain (C-C-C-C) However in the next member butane (C₄H₁₀) there is a scope for branching.

The alkanes corresponding to these structures are called butane (n-butane) & 2-methylpropane (isobutane)

These are the examples of the chain isomers which may be defined as the compounds having the same molecular formula but differing in the nature of the chains of the carbon atoms. It may be noted that as the number of the carbon atoms in a molecule increases the extent of branching increases accordingly. Thus pentane (C₅H₁₂) has three chain isomers given below.

IUPAC Nomenclature :-

① The longest carbon chain in the molecule is identified. The compound is named as a derivative of hydrocarbon corresponding to the longest chain. For example if there are five carbon atoms in the longest chain the hydrocarbon will be named as derivative of pentane & so on.

② The position of different alkyl group is noted the numbering is done in such a way that the sum of the numbers corresponding to the position of alkyl group is minimum. This is called lowest sum rule. This illustrated with the help of examples given below.
